Premium Voice Services

Switched Long Distance is the ideal solution for customers with standard to medium long distance calling volumes. This solution transports high quality inbound (toll-free) and outbound calls without the need for expensive WAN equipment. We offer all of the long distance calling capabilities that you need- Local toll (IntraLATA), In-state (IntraState), Out-of-state (Interstate), and International calling.

Flexible Billing Options

Multiple billing options are available to fit your preferences. Whether you require a single bill or have several locations, we can make it work for you. Automatic Account Debit is also available, allowing you the freedom to pay monthly invoices automatically without writing a check.

Features:

Call blocking
Direct Termination Overflow
DNIS
ISDN Signaling
Multiple trunk groups

Real time ANI
Routing features
Security & Account Codes
Toll-free

Direct Termination Overflow- Allows customer to control potential congestion of calls placed on a toll-free by sending overflow calls to another toll-free group, WATS access line, dedicated access line, or business line.

DNIS- Allows customer to receive calls from multiple toll-frees on the same termination trunk group by sending special identification digits along with the toll-free call to the customer site.

Real time ANI- Allows a dedicated customer to receive the ANI of the calling party if the call originates from an equal access end office.
