Web Conferencing

Collaborate with anyone in the world right over the internet. Participants simply point their browsers to the designated Web address to join the meeting. As the conference host, you control what they are seeing - whether it's a presentation, web tour, or software demonstration. Your participants will enjoy crystal clear audio connections through their standard telephones.

Audio & Video Streaming

Our webcasting solution features a web-based user interface that integrates any combination of audio, video, PowerPoint slides, text messaging, and speaker photos. Video is an optional feature of our webcasting solution. You can easily produce and transmit your own video or simply have us send a crew.

Enterprise Solutions

Whether you are a Fortune 100 corporation or a company with fewer than 100 employees, Access One has a phone and web conferencing solution for you. A dedicated account manager will help you quickly set up your service and will always be available for ongoing support.
