Customized Voice Solutions.

- ▶ The flexible, cost effective solution for customers with heavy local call volumes.
- ▶ Eliminates the need for expensive equipment while allowing for additional services or features.
- ▶ Utilized for both inbound and outbound traffic
- ▶ Channel bank hardware converts the digital voice circuit into analog lines.

Premium Voice Services

Local Analog is a channelized 1.5M digital T1 circuit, equipped with up to 24 channels of voice that can handle both inbound and outbound traffic. Unique to this product is the analog handoff, which allows analog numbers to be assigned to each channel without the need for expensive LAN equipment.

Tailored Usage Plan

Our **Flat Talk** option is the perfect solution for businesses with heavy call volumes.

Measured options offer low cost per minute rates and are the ideal solution for businesses with standard to medium call volumes.

Flexible Billing Options

Multiple billing options are available to fit your preferences. Whether you require a single bill or have several locations, we will make it work for you. Automatic Account Debit is also available, allowing you the freedom to pay monthly invoices automatically without writing a check.

Features:

Caller ID/Caller ID with Name

Call Transfer

Call Waiting

Failsafe Routing

Provides another level of redundancy. Calls are redirected to another location in case of a disabled PBX, overflow scenario, or failed circuit.

Hunting

Remote Call Forward

Allows incoming calls to be forwarded to another telephone number and provides local identity for companies without requiring a physical presence in the area.

Voicemail
