

Integrated Data & Voice

Maximize business productivity by maximizing the use of your bandwidth. Access One offers integrated products that simplify your telecommunication needs and cost by combining voice and high-speed data over a single circuit.

Dyversaband®

Fixed voice and Internet bandwidth limit utilization, resulting in underutilized bandwidth. Dyversaband® uses your bandwidth to its fullest capacity no matter what time of day it is or how many voice lines are in use.

Benefits

- Cut costs by combining services on one single circuit
- Optimize voice lines and data bandwidth
- Scalable and secure
- Seamless communications across multiple IP locations
- Unparalleled support 24/7

Features

- Caller ID name and number
- DIDs
- Directory listing
- Failsafe routing
- Voice compression enabled
- IP addresses
- Remote call forward on demand
- Security and account codes
- Virtual exchange
- VoIP technology

Options

- Bonded T1 delivery
- Ethernet delivery
- Fully managed router
- Multiple signaling formats available

“Thanks to the team at Access One for their help during the installation of our new Internet circuit. For both our Internet and phone needs, Access One has provided rock solid service and outstanding support.”
