

Managed Services for HEALTHCARE COMPLIANCE

Healthcare organizations understand the importance of protecting sensitive patient information to meet the regulatory requirements of the Health Insurance Portability and Accountability Act (HIPAA).

WHAT ORGANIZATIONS ARE REQUIRED TO COMPLY?

Covered Entities:

- ✓ Providers that conduct electronic billing transactions
- ✓ Payers, including Medicare, Medicaid, private health plans, and self-insured businesses

Business Associates:

- ✓ Businesses that support covered entities and may come into contact with private health information (PHI) or the systems that store or process it

The U.S. Department of Health and Human Services Office for Civil Rights along with the State Attorney General and the U.S. Department of Justice all may enforce healthcare compliance regulations. Organizations in breach of HIPAA may face enormous financial penalties, often in the form of lawsuits.

ACCESS ONE CAN HELP YOUR ORGANIZATION STAY COMPLIANT

Our IT security services help healthcare organizations safeguard valuable PHI – and remain HIPAA compliant. You can rely on us for:

- ✓ **HIPAA/NIST CSF** support to ensure you're meeting the industry security requirements for the protection of PHI.
- ✓ **Risk Assessment** to ensure you're aware of areas where PHI may not be properly protected including supply chain risks.
- ✓ **Advanced Security Controls** that guarantee your security programs effectively reduce risk of advanced persistent threats (APTs).
- ✓ **Encryption** that keeps PHI guarded throughout the information lifecycle.
- ✓ **Data Loss Prevention** so access to sensitive patient information is limited to those employees who require it, thereby minimizing sensitive data exposure.
- ✓ **Compliance Reporting** that will help you monitor the status of your security and compliance efforts.
