AC42 four-door controller
Thoughtfully Designed for Versatility and Scalability

Overview

Secure entryways with cloud-managed access control through the versatile AC42 four-door controller. The AC42 can power four doors with Verkada or Wiegand readers. Each door port can support two REX devices and a door position indicator (DPI), allowing for native in/out door support. The AC42 also supports two 12V AUX devices and a connection to a fire alarm interface (FAI).

Key features

Terminal block design

Power Verkada or third-party readers and any standard door locking hardware.

On-device reliability

Onboard storage and processing capabilities ensures that device will operate even if it has lost power or its internet connection.

Remote Door Unlock

Remotely unlock any Verkada-secured door from Command or the Verkada Pass app.

Centralized management

Centralize access control credential, site and schedule management across geographies.

Fire alarm integration

Allow faster egress and firefighter access by automatically remove power from maglocks when a fire alarm occurs.

Simplified installation

Stenciled install diagram and cable organizer simplify installation.
