

NEVER BE A RANSOMWARE HOSTAGE

Fight back with the only cloud solution
that keeps your email running.

Ransomware can creep into your organization via email, drain productivity and cost you millions.

And, cybercriminals are constantly distributing new forms of ransomware and re-inventing existing ones.

How's a business supposed to cope?

Start with email. Mimecast is the only cloud solution that combines security, business continuity and data replication for email.

No one is safe. According to the FBI, this year ransomware infected

100,000
computers
a day

Nearly
50%

of all malware blocked by
Mimecast in the last three
months was ransomware.

Mimecast packs a powerful punch against ransomware, and helps you to:

Prevent a ransomware attack.

Ensure that employees **continue**
to work in the event of an attack.

Store your data in a third-party
archive so it's not lost forever
after an attack.

Protect your email from ransomware.
