Managed Services for
DEFENSE COMPLIANCE

DFARS 252.227-7012 is a regulatory requirement for Department of Defense (DoD) contractors and subcontractors to protect Controlled Unclassified Information (CUI) with the NIST 800-171 cybersecurity framework. The Cybersecurity Maturity Model Certification (CMMC) will eventually replace NIST 800-171 and will require an independent accredited body to perform controls audits to certify all of the necessary regulatory requirements have been met.

WHAT ORGANIZATIONS ARE REQUIRED TO COMPLY?

All Department of Defense (DoD) contractors and subcontractors must protect CUI within their corporate systems and implement flow down requirements. These entities are required to implement NIST 800-171 and post a System Security Plan (SSP) attestation to the Supplier Performance Risk System (SPRS) for federal public record. All discovered risks must be remediated.

Who Enforces Defense Contractor Compliance?

✔ SPRS is a legal attestation of compliance backed by penalties of criminal fines and judgments in the False Claims Act (FCA). The lack of transparency and trust within the Department of Defense also poses significant risk to the acquisition and sustainment of DoD contracts.

ACCESS ONE CAN HELP YOU STAY COMPLIANT

Our IT security services help defense contractors stay compliant with DFARS regulations. You can rely on us for:

✔ **NIST 800-171 CSF** support to ensure you're meeting the DoD industry regulatory requirements for cyber security.

✔ **Risk Assessment** to ensure you're aware of areas where CUI may not be properly protected including supply chain risks.

✔ **Advanced Security Controls** that guarantee your security programs effectively reduce risk of advanced persistent threats (APTs).

✔ **Encryption** that keeps CUI guarded throughout the information lifecycle.

✔ **Data Loss Prevention** so access to sensitive defense data is limited to those employees who require it, thereby minimizing sensitive data exposure.

✔ **Compliance Reporting** that will help you monitor the status of your security and compliance efforts.

ALIGN WITH ACCESS ONE FOR YOUR COMPLIANCE NEEDS

Defense contractors that must meet DFARS regulations can rely on the Access One cyber security experts to protect CUI and remain compliant. **Get in touch** with us today to get started.
